## II. CLAIM AMENDMENTS

\* The second of the second of

- 1. (Currently Amended) A communication device comprising a keymat, a cover, and a substrate comprising a plurality of key switches, wherein, said keymat comprises a plurality of lips located at and extending outward from edges of said keymat toward a rim of the cover, and said cover comprises a plurality of indentations configured to receive said plurality of lips, wherein said indentations are located at edges of a recess for removably mounting said keymat.
- 2. (Original) Communication device according to claim 1, wherein said keymat comprises one or more guiding pieces, and said cover comprises one or more corresponding guiding recesses.
- 3. (Original) Communication device according to claim 2, wherein said guiding pieces are arranged in direct connection to one or more of said plurality of lips.
- 4. (Original) Communication device according to claim 1, wherein said keymat comprises one or more guiding recesses, and said cover comprises one or more corresponding guide pieces.
- 5. (Currently Amended) Communication device according to claim 4, wherein said guiding pieces comprises one or more ribs extending to be received by said guide—pieces\_recesses.
- 6. (Currently Amended) A cover for a communication device comprising a recess for receiving a keymat comprising a plurality of lips extending outward from edges of the keymat, compriseing the cover further comprising a plurality of indentations located at the edges of said recess for receiving said plurality of lips.

7. (Original) Cover according to claim 6, further comprising one or more guiding recesses.

- 8. (Original) Cover according to claim 7, wherein said one or more guiding recesses are arranged in direct connection to one or more of said plurality of indentations.
- 9. (Original) Cover according to claim 6, further comprising one or more guiding pieces.
- 10. (Original) Cover according to claim 9, wherein said guiding pieces are one or more ribs on a surface of said cover facing a place where a keymat is to be mounted.
- 11. (Currently Amended) A keymat for removable mounting on a cover of a communication device, comprising lips located at <u>and extending from edges</u> of said keymat configured to <u>extend outward toward a rim of the cover and insert into indentations of said cover.</u>
- 12. (Original) Keymat according to claim 11, further comprising one or more guiding pieces.
- 13. (Original) Keymat according to claim 12, wherein said guiding pieces are arranged in direct connection to one or more of said plurality of lips.
- 14. (Original) Keymat according to claim 11, further comprising one or more guiding recesses.
- 15. (Original) Keymat according to claim 14, wherein said one or more guiding recesses are an incision in a surface that is to be in contact with said cover when mounted on said cover.

16. (Original) Keymat according to claim 11, being moulded in one piece.
